BIO-CYLINDER BIO-DEGRADABLE TEST CYLINDERS

6"x12" Test Specimen
Custom imprinting available
(Shown with optional Imprinted Generic Label)

4"x 8"
Test Specimen
(Shown with optional Imprinted Generic Label)

6x12 Test White Specimen
(Shown with optional Imprinted Generic Label)

PATENT # 12/006,548

Molded with EcoPure™ additive which allows plastic to bio-degrade when placed into an active landfill.

LIDS

The cover interlocks with the test cylinder to provide consistent and uniform curing, and helps reduce mold deflection and provides consistency in mold shape. This ensures easy stripping from the mold. Available for all sizes of test cylinders.

FEATURES

- **Bio-degradable • Recyclable • Unlimited shelf life**
- **BIO-CYLINDER™ test cylinders meet A.S.T.M. specifications C39, C192 and C470**
- **BIO-CYLINDER™ mold is non-absorptive**
- **Molded single unit for consistent dimensional uniformity**
- **Top rim eliminates deformation**
- **Smooth molded plastic allows quick, easy stripping**
- **Strong, durable BIO-CYLINDER™ is weather resistant —eliminates job-site storage problems**
- **Custom silk screen labeling available**
- **BIO-CYLINDER™ lids and stripping tools available**
- **Available in 6x12, 4x8, 3x6, and 2x4.**
- **Custom Colors Available**

EcoPure conforms to ASTM D-5511

For quality control and for reference in the case of concrete failure, test specimens are very essential to the engineer and concrete producer. To insure that the only variable is the concrete itself, use correct curing and sampling procedures and BIO-CYLINDER™ concrete test cylinder molds. They give consistent, dependable performance. 6 x 12 cylinders are available in lipped or small lipped design.
