

VERS-A-SHIM® BEARING STRIPS

Vers-A-Shim® Bearing Strips are used for placing and leveling precast panels, tilt slabs and other architectural or structural components. Our bearing strips are designed to be placed between precast concrete floor slabs and a supporting wall or beam. The smooth surface of our bearing strips allow movement of precast floor slabs and helps them easily slide into their final position.

- Strips are easily applied and lay flat.
- Smooth surface to allow a precast plank to slide easily.
- Custom sizes available.

CAT#	SIZE	PIECES PER CARTON
PC24814	2" x 48" x 1/4"	72
PC24818	2" x 48" x 1/8"	144
