

Deslauriers

PIPE BRACE CONNECTOR

Deslauriers' Pipe Brace Connector allows standard pipe braces to be used with Deslauriers' Column Forms.

Simply replace the form connector with the Pipe Brace Connector, and bolt to a horizontal flange on the column form. Installation of each bracket requires two sets of 1/2" dia. x 2" coil bolt and nut. Pipe brace connecting bolt provided by others.

CAT# HD-PBC: (Rental) Minimum 28 days.

DOUBLE PIPE BRACE CONNECTOR

Deslauriers' Double Pipe Brace Connector can be used to erect and plum column forms. It can also be used to brace from a capitol form down to a column form when pouring a column and capitol monolithically.

Merely replace the form connector with the Deslauriers' Double Pipe Brace Connector, and bolt to a horizontal flange on the column form. Installation of each bracket requires two sets of 1/2" dia. x 2" coil bolt and nut. Pipe brace and pipe brace connecting bolt provided by others.
